- A minimum clearance of 10 cm is required between other equipments.
- Must be plugged directly into a properly grounded. Improper grounding could result in electrical shock or accident. Never connect with gas pipe.
- Don't place near water or oil. It could result in electrical shock, fire, accident or transformation.

Parts Description

Description : Electric Conveyor Toaster

Model : TM-5H

Power : AC100V

Electricity

Consumption : 1480W

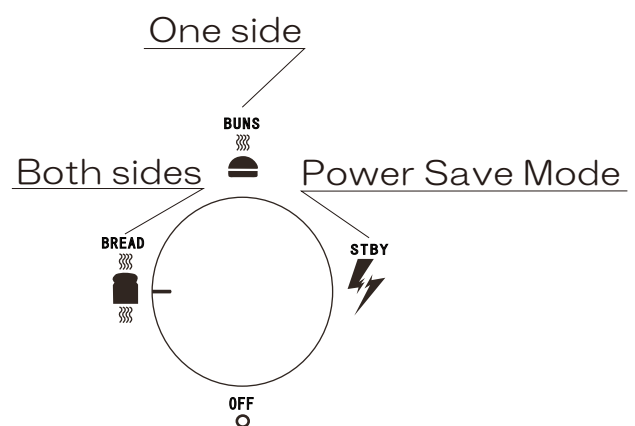

Measurements : 290(W)×420(D)×420(H)

Entrance : 175(W)×89(H)

Shipping Weight:16kg

Capacity:150slices per hour.

About the Switch/Thermostat

☆The power at the saving mode becomes 25% usually.

Set-up

- Install the legs.

If unit is not level, use 9/16" (14mm) open-end wrench to adjust the foot of each leg until unit is level.

- Toast Feed Ramp

The toast feed ramp is installed at the factory and can be used in two positions. See Figure 1.

1. When in the upright position, the toaster is set for automatic feed. Bread products enter the toaster by placing them on the feed ramp and releasing.

2. For manual feeding of product, tip the feed ramp until it rests on top of the unit. In this position bread products can be manually loaded by placing them directly on the conveyor belt.

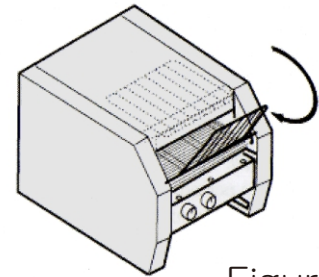

Figure 1.

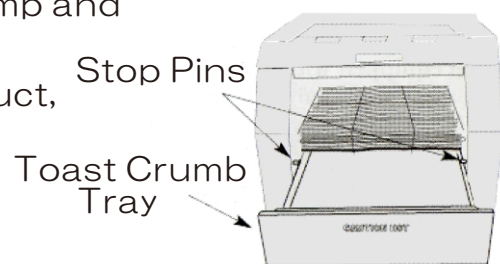

Figure 2.

- Toast Crumb Tray

Install toast crumb tray directly conveyor belt and below the stop pins. Insert until the front of the crumb tray meets the stop pins. See Figure 2.

- Front/Rear Discharge

The toaster can be configured to discharge in the front or rear. User can pull up the rear discharge door for front discharge

(See Figure 3) and push down the rear discharge door for rear discharge.

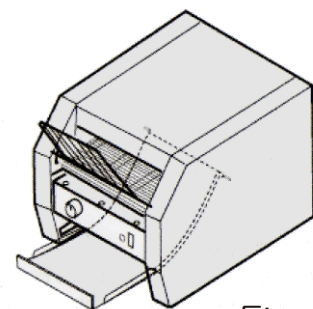

Figure 3.

Operation

For model equipped with rocker switch

1. Plug toaster into a properly grounded electrical outlet of the correct voltage, size and plug configuration.
2. Place the On/Off switch in the On position.
3. Turn the Color Control to the lightest position while the unit heats up.

Note: Allow approximately 15 to 20 minutes for a warm-up period.

4. After warm-up period, set the Color Control to the medium position and toast two slices of bread product then re-adjust the Color Control to the desired setting.

Note: To toast moist products such as English Muffins, rye bread or whole wheat, slow the conveyor by turning the Color Control knob to a darker setting (clockwise)

For model equipped with rotary selector

1. Plug toaster into a properly grounded electrical outlet of the correct voltage, size and plug Configuration.
2. Rotate the Rotary switch in the high-heat position.
3. Turn the Color Control to the lightest position while the unit heats up.

Note: Allow approximately 15 to 20 minutes for a warm-up period.

4. After warm-up period, set the Color Control to the medium position and toast two slices of bread product then re-adjust the Color Control to the desired setting.

Power Save Mode

The toaster can go into a Power Save mode by turning the rotary selector into power save mode. The toaster is operating at 25% power.

Note : To place toaster back into full operation turn the selector back into TOAST. Unit is back up to full power within 5 minutes.

Safety

- This product should not be cleaned with water. It's very dangerous.
- Wipe off the product with a dry cloth and always keep clean.
- If the plates don't work sufficiently, contact with your agency. To change the plates is at your cost.
- A warranty should be retained carefully, it's written a serial number of the product.
- Should attach a warranty with the product when you order the repair of the product under warranty.
- This manual should be retained carefully for future reference.
- Unit is not weatherproof. For safe and proper operation locate the unit indoors where the ambient air temperature is a minimum of 21°C and a maximum of 29°C.
- The toasting of coated or buttered products such as garlic bread, cheese sandwiches and sweet rolls is NOT recommended. Residue will reduce toaster performance and could possibly ignite inside the toaster.
- Some exterior surfaces on the unit will get hot. Use caution when touching these areas to avoid injury.
- To avoid damage to the unit or injury to personnel always operate toaster with crumb tray installed.

Cleaning

To avoid any injury, turn the power switch off, unplug the unit from the power source and allow to cool before performing any cleaning.

Exterior

To preserve the bright finish of the unit, it is recommended that the exterior surfaces be wiped daily with a damp cloth. Stubborn stains may be removed with a good stainless steel cleaner or a non-abrasive cleaner. Hard to reach areas should be cleaned with a small brush and mild soap. Use only non-abrasive cleaners.

Toast Crumb Tray & Toast Collector Pan

Remove from unit and wash with soap and water, then rinse. To avoid any injury, do not remove the crumb tray for cleaning until it is cool.

Toast Feed Ramp

Press in the two wire spokes and remove guide from unit. Wipe clean with a soft, damp cloth or soak the guide in a mild solution of 1 cup ammonia and 1 gallon of water (227 milliliters and 3.785 liters). Re-install guide by aligning wire spokes with holes in toaster.

After Service

This product is attached the warranty.
(Excluded Teflon plates)

■ Limited Warranty ———

- Should read and retain the warranty carefully.
This warranty is valid only in Japan.
This warranty is invalid to use the product in other countries.
- The warranty runs for one year from the date of purchasing.

■ Request for Repair ———

- When the product doesn't work well, contact with your agency and request to check the product.
- If it's under warranty, should attach the warranty with the product.
- When you order to repair, should attach a memo which is written a breakdown condition of the product.
